

Constructing Courses to Enhance Learning 2014

| SMS Code | LT704001 | | |
|----------------------|----------|---------------------|----|
| Level | 7 | Credits | 10 |
| Total Learning Hours | 100 | Contact Hours | 30 |
| Directed Hours | 60 | Self Directed Hours | 10 |

Facilitator: Bronwyn Hegarty – Ph: 021 735 438

Location: CapableNZ – cnr Harbour Terrace/ Union St East. **Freephone:** 0800 762 786 – ext 8146 or Speed Dial to cell - 9335

Email: bronwyn.hegarty@op.ac.nz

Introduction

Welcome to Constructing Courses to Enhance Learning. This course uses online learning and face-to-face workshops. Access to the online resources is through the wiki website:

http://wikieducator.org/Constructing_Courses_to_Enhance_Learning - asynchronous online discussions can be accessed on http://moodle.op.ac.nz. Web conferencing is offered via Adobe Connect.

Aim

To assist participants to design flexible learner centred courses and integrated programmes linking outcomes with learning activities, content and assessment, and accommodate learner, discipline, departmental, organisational, and industrial or professional body needs.

Learning Outcomes

At the successful completion of this course, participants will be able to:

- 1. explore and critique learner centred educational design principles and models;
- 2. articulate practice of integrated flexible course and programme design and delivery including an understanding of the involvement of stakeholders (both within and beyond the institution);
- 3. apply the principles and processes of learner centred educational design and professional practices to an existing or new course with respect to the design, development, implementation and evaluation of the approach, critiquing each phase.

Content

- 1. An analysis of the proposed learners and their context: learner diversity,
- 2. The institutional vision; discipline, professional and industry expectations and responsibilities; and other stakeholder perspectives.
- 3. Design theory and course/curriculum design approaches, emphasising active learning, workplace practices and flexible delivery modes.

- 4. Integrated course/curriculum planning which link specific and generic learning outcomes to learning activities and teaching strategies, content and assessment, and take into account levels, learners, disciplines, as well as industry/professional body expectations and requirements.
- 5. Development of learning and assessment environments clarifying an appropriate balance of face to face, blended or distributed including on-line or other interactions to achieve planned learning outcomes; designing interactive learning objects, activities and materials to support learner centred learning; maintaining currency with developments in technology and incorporating them when appropriate.
- Implementation planning, including the roles of reflection, collaboration, and conversation in curriculum and course development, as well as communicating and disseminating aspects of design practice and theoretical ideas about teaching and learning design within and beyond specific disciplines in order to justify design decisions.
- 7. Models of evaluation and moderation of course design, e.g. peer review, student feedback.

Assessment

Four assessment activities are offered, two are formative and two are summative. Three of the assessments form the basis of the final assessment, the digital presentation of your course design to your fellow students, along with your justification of the design decisions that you have made.

Completion requirements

To achieve a pass for this course, you must successfully complete all formative and summative assessments. The due dates are a guide.

Table 1: Assessment schedule

Assessment Activity Related learning Suggested format Due date outcome Formative: Analysis of 1. 2 1 - 2 weeks Blog. learners and context. Formative: Design 1, 2, 3 Blog or Moodle book. 3 weeks overview. Summative: Design, 2, 3 10 November or Blog and/or Moodle book. Development. 1 December 2014¹ implementation and Evaluation plan. 10 November or Summative: 2, 3 Digital. Can be a Presentation. summary on your blog. 1 December 2014 - see footnote.

¹ For December 2014 graduation submit assessments by 10 November 2014. For March 2015 graduation submit assessments by 1 December 2014.

Assessment Instructions

Table 2: Formative assessment instructions.

| Assessment Instructions | Items to be included | Items to be included |
|---|--|---|
| 1. Analysis of Learners and Context (10 hrs). Formative. Describe the learners and their context -for the course which you wish to design (or redesign). Submission: post to blog (600 words). | A. Description of the learning environment - learners and context. Discuss: context of the proposed course; learner diversity; organisational or sector vision; considerations for the discipline; professional and industry expectations and responsibilities, and other stakeholder perspectives. | B. A summary of the main points about the context and learners discussed in the first part of the analysis. Also, include: goals for the design phase. Finalise the Analysis of Learners and Context once you receive feedback. |
| 2. Design overview (15 hrs). Formative. Prepare an overview about your flexible learning design — based on educational design principles and/or models that | A. Theory of design Step 1: Select at least one design principle or model, and a learning theory and describe how this theoretical perspective supports flexible learning in your chosen course. | B. Practical application Step 3: Choose or create a framework or template to plan the flexible learning design. Complete the framework either as a table or diagram. |
| promote learner-centred approaches. Submission: Blog and/or Moodle book. | For example, if using the ADDIE design model, you are describing components of the Design phase. Step 2: Plan how you will apply the components of the design model and learning theory to flexible learning strategies for delivering content (resources), activities, communication/interaction and assessment in a course. | Step 4: Prepare a draft written Design Overview on your blog or Moodle book, and include: a detailed description of the design of the flexible learning strategies (with table or diagram), the underpinning design and learning theories, and how the design will improve learning for your students. |
| | | Step 5: Once you receive feedback on the draft, make adjustments to the Design Overview to finalise it. |

Table 3: Summative assessment instructions.

| Assessment Instructions | Items to be included | Items to be included |
|--|---|--|
| 3. Plan for development, | A. Development and Implementation | B. Evaluation Plan |
| implementation and evaluation (30 hrs). | plan | Include: Introduction: how will you evaluate the |
| Summative. Prepare a plan using a Moodle | Step 1: Include or link to finalised components of the two formative assessments | success of your new course design? - What criteria will you use to judge success? |
| Book or other option. You can be creative with colour and media such as images and video as well as links to digital material. | (1. Analysis of Learners and Context, and 2. Design Overview). Step 2: Develop the Design, Development and Implementation plan using the headings in the template that is provided. Step 3: Request feedback and make changes to finalise the plan. | Decisions: what will you do with the information obtained? How will the outcomes of the evaluation influence or impact on the stakeholders? Types of evaluation – formative or summative: who will you get to review your design and test it before you go live, or once it is launched or at the end of the first offering? Methods: how will you gather and analyse your data? |
| 4. Presentation (5 hrs). | A. Design the presentation | B. Create the presentation. |
| Summative. Prepare a digital presentation of your plan and post to your blog. | Prepare a script or storyboard for presenting the plan. Decide on the format of the presentation. For example, slides with audio (Powerpoint, Slideshare, Bubbleshare etc.), video with audio, a recorded computer conference, e.g., Adobe Connect, digital story using Windows Moviemaker or Animoto. A blog post summarising the plan is also acceptable. | Include: - a variety of media (e.g., text, images, audio, diagrams, video); - information - introduction, background, stakeholders, design and learning theory, flexible learning strategies, and integration, and references overview of the evaluation approach. |

Table 4: Marking Criteria

| Assessment Criteria | Met | Feedback |
|--|-----|----------|
| 1. Analysis of Learners and Context. | | |
| Description of learning environment covers learner diversity and context in relation to the organization or sector, the discipline and stakeholder expectations. Summary provided with goals. Posted to blog. 2. Design overview. Includes: a detailed description of the design of the flexible learning strategies (with table or diagram), the underpinning design and learning theories, and how the design will improve learning for students. | | |
| A. Development and Implementation plan Template headings used. Plan is detailed, meets stakeholder needs and includes justification based on the literature. | | |
| 3. B. Evaluation Plan | | |
| Includes: | | |
| Introduction – overview of methods and criteria. Decisions - influence on stakeholders. Types of evaluation – formative or summative and participants involved. Methods – data collection and analysis. | | |
| 4. Design and Create a Presentation | | |
| Format is appropriate. Uses a variety of media to provide interest. Information includes - introduction, background, stakeholders, design and learning theory, strategies, integration and references. Evaluation approach is outlined. | | |
