

Maintaining non-engine parts

What you will learn

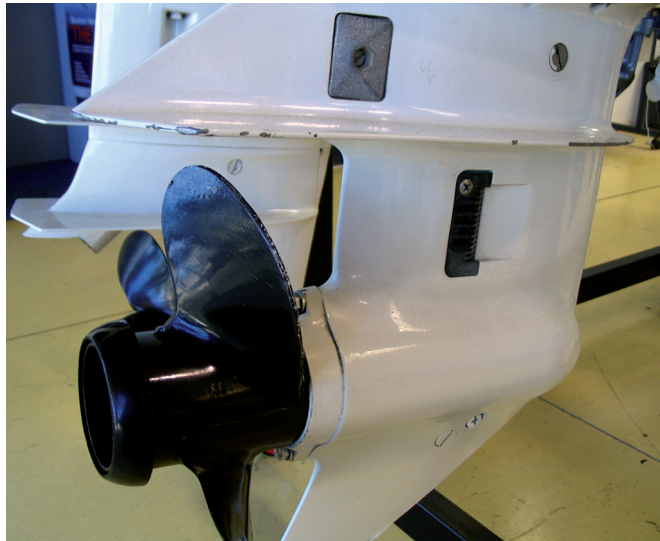

When you have finished this module, you should know

- About user maintenance of parts of your machines other than the engine
- What parts need maintenance
- How to look after them.

In this module there are worksheets covering different types of equipment:

- outboard motors
- chainsaws
- mowers

Each worksheet covers the *typical* user maintenance needed for that type of equipment. Each make and model will be slightly different in what is needed.

Things you need before you start

Materials

Your equipment maker's information – manuals – on how to do the tasks

.....

Tools

Each worksheet shows you what tools you need
