# Methods of ODL Delivery

# Introduction

This module introduces you to the varied methods used in the delivery of Open and Distance Learning (ODL) programmes. You will be introduced to:

- Synchronous methods of delivery
- Asynchronous methods of delivery
- Learner support strategies inherent in ODL methods of delivery.

# Module Objectives

**At the end of this module you will be able to:**

- identify different methods used in the delivery of ODL programmes
- distinguish between synchronous and asynchronous approaches to delivery
- identify synchronous and asynchronous tools
- identify types of learner support strategies in the delivery of ODL programmes
- apply ODL delivery methods in the delivery of content.
