

# My Very Own FunPark!

- You have **FOUR periods plus homework** to design the ultimate, the most spectacular, the most daring fun park of the universe.
- You have to present this on a piece of A3 provided by me.
- You should present it in a pictorial map format, explaining and showing along the way all the features that your fun park has.
- You need to have at TEN different rides or activities.
- You will need to think about all the amenities you have to provide for the public - (things such as toilets, snack shops and First Aid).
- Be creative and inventive. Think up a really catchy name (use alliteration) for the park.
- Design a draft on A4 paper before doing your good copy on A3.

You also have to create a SIX page brochure. Fold a piece of A4 into thirds to create six sections.

On **page one** put your title and an illustration.

On **page two** write about the attractions – the thrills and spills page.

On **page three** draw a mini map of your park and provide a key showing your rides.

On **page four** have your prices and deals for families etc.

On **page five** have your EIGHT rules and regulations for your park.

On **page six** have your contact details such as email and www.

Also draw a small map to show where you are.
