Course:

AB-1

Critical

Understanding

of ICT

By Dr. Pooja Manghirmalani- Mishra

UNIT 3.6

Social Learning

MODULE I: ICT IN EDUCATION AND ITS IMPLICATIONS

Unit 3: Emerging Trends in E-Learning

1.1 Introduction

1.2 Web 2.0

1.3 Social Networking

1.4 Blog

1.5 Video Conferencing

1.6 Discussion Forum

1.7 Conclusion

1.1 INTRODUCTION
(to Social Learning)

Social-Learning

Social Learning Theory speculates that people learn from one another, via observation, imitation, and modeling. The theory has often been called a bridge between behaviorist and cognitive learning theories because it encompasses attention, memory, and motivation.

Defined the Theory of Social Learning

Albert Bandura

1.1 INTRODUCTION

Social Learning – in 2017

- ✓ Massive Growth In Gamification

- ✓ More Programs Embraced Microlearning

- ✓ Open Educational Resources (OER) has Become More Sophisticated

- ✓ Big Data is More Important Than Ever

- ✓ Social Learning Tools have Become More Sophisticated

- ✓ Learning Management Systems have Continued To Evolve At A Breakneck Speed

- ✓ Mobile has Dominated over everything

1.2 Web 2.0

The Internet is a rich resource for teaching and learning. Web 2.0 refers to a more recent 2nd generation collection of web-based tools, usually involving social networking (sites like Facebook) and amateur publishing (like blogs and YouTube).

Web 2.0" refers to what is perceived as a second generation of web development and web design. It is characterized as facilitating communication, information sharing, interoperability, user-centered design and collaboration on the World Wide Web. It has led to the development and evolution of web-based communities, hosted services, and web applications. Examples include social-networking sites, video-sharing sites, wikis, blogs, mashups and folksonomies.

1.2 Web 2.0

1.3 BLOG

A regularly updated website or web page, typically one run by an individual or small group, that is written in an informal or conversational style.

Some interesting blogging sites

- ✓ Blog.com
- ✓ Blogger.com
- ✓ Medium.com
- ✓ Squarespace.com
- ✓ Wix.com
- ✓ Weebly.com
- ✓ Ghost.org
- ✓ Penzu.com

1.3 BLOG

How to create a blog?

EXAMPLE:

1. Go to www.HostGator.com and then click "Start Your WordPress Blog".
2. Pick a Domain name for your blog.
3. Choose your blog hosting plan.
4. Complete your registration.
5. Log in to your new account and install WordPress blog.

1.3
BLOG

1.4 Social Networking

Social Networking Services are building online communities of people who share interests and/or activities, or who are interested in exploring the interests and activities of others. Most social network services are web based and provide a variety of ways for users to interact, such as e-mail and instant messaging services. The main types of social networking services are those which contain category divisions (such as former school-year or classmates), means to connect with friends (usually with self-description pages) and a recommendation system linked to trust. Popular methods now combine many of these.

Popular social networking sites are:

Facebook, MySpace, Twitter and LinkedIn.

1.4 Social Networking

1.4 Social Networking

1.5 Video Conferencing

Video conferencing comprises the technologies for the reception and transmission of audio-video signals by users at different locations, for communication between people in real-time.

1.5 Video Conferencing

Popular applications for video conferencing

- ✓ FaceTime
- ✓ Google Hangout
- ✓ Whatsapp Video Call
- ✓ IMO
- ✓ Skype
- ✓ Zoom

1.6 Discussion Forum

An Internet forum, or message board, is an online discussion site where people can hold conversations in the form of posted messages. They differ from chat rooms in that messages are often longer than one line of text, and are at least temporarily archived.

Also, depending on the access level of a user or the forum set-up, a posted message might need to be approved by a moderator before it becomes visible.

Forums have a specific set of jargon associated with them; example: a single conversation is called a "thread", or *topic*.

A discussion forum is hierarchical or tree-like in structure: a forum can contain a number of subforums, each of which may have several topics. Within a forum's topic, each new discussion started is called a thread, and can be replied to by as many people as so wish.

1.7

KEEP CALM AND LISTEN TO THE CONCLUSION

Companies all over the world have now embraced the practical application of social learning theory because it has proven itself to be tremendously effective over and over again. Millennials are now the largest generation in the global workforce and this brings a number of unique changes to the way organizations are training their personnel. The days of classroom lectures in a corporate environment are dying and they are giving way to newer and much more effective systems, like social learning.
