Name - S.M.Pradeep

- In Sri Lanka agriculture sector, there are few amounts of large scale investors on agriculture. Therefore large scale investment by foreign nation conducted project in agriculture sector in Sri Lanka.
- As a country, we do not export big volume of agriculture products. Therefore, to be competitive in global agricultural market, agriculture sector of Sri Lanka needs to increase the volume of exports.
- Agricultural market research should focus on development on livelihood improvement, poverty alleviation, achieving food security, enhancing agro-based industries and also preparing the agricultural sector to face global challenges.
- In comparison with development countries, which have many kind of insurance policies for farmers. So that, as a country to hope the development of agriculture, we should introduce appropriate agricultural insurance schemes to protect the farmers from risk.
- It is necessary to introduce simple procedures in providing long facilities for agricultural marketing activities and agro-based industries.
