OARAS: Learning Design Template
To guide the planning, design, development and creation of a learning resources and activities to meet the occupational standards of a unit /module, relevant to a specific skill set.

Qualification, Unit / Skills QCF LEVEL 2- COMPUTER HARDWARE MAINTENANCE AND REPAIRS TECHNICIAN II

Unit 6: Describe Management of Computer Hardware Maintenance and Repairs Business – 3 credits

LO 1: Understand the Procedure to Set up a Computer Hardware Maintenance and Repairs Business

PC1 .1 Describe the appropriate equipment and facilities for setting up computer hardware maintenance and repairs workshop

PC 1.2 Identify appropriate locations for the business

PC 1.3 Describe the appropriate size and layout for the workshop

PC 1.4 Maintain clean, safe and secure work environment

LO 2: Apply Managerial and Customer Service Principles to Computer Hardware Maintenance and Repairs Business

PC 2.1 Describe how to attend to customers with faulty computers

PC 2.2 Explain the normal documentation process when collecting and returning computers to customers

PC 2.3 Demonstrate good communication and interpersonal skills to achieve customers satisfaction

PC 2.4 Keep good records of income, expenses, assets and liabilities of the business

PC 2.5 Estimate the cost of repair of faulty computers

LO 3: Raise Funds or Capital for Computer Hardware Maintenance and Repairs Business

PC 3.1 Propose start-up capital required for a computer hardware maintenance and repairs business

PC 3.2 Identify various sources of capital to set up the business

PC 3.3 Explain the returns on investment for the business

PC 3.4 Maintain a good stock control and inventory of spare parts and modules

OARAS: Learning Design Template

To guide the planning, design, development and creation of a learning resources and activities to meet the occupational standards of a unit /module, relevant to a specific skill set.

Outcomes (occupational standard, knowledge, skills, attitudes, competencies, learning outcomes)	Assessment (learner meeting the standard based on assessment or naturally occurring evidence at the workplace)	Resources (resources needed for the learner to work with and learn)	Activities (description of activity(s) learner is engaged in including learning hours)	Support (learning support with the subject, concepts, or numeracy, literacy, ICT and/or study skills)
Understand the Procedure to Set up a Computer Hardware Maintenance and Repairs Business	PC 1.1, 1.2 and 1.3 Provided with two (2) scenarios the learner identifies appropriate locations for Computer Hardware Maintenance and Repairs business. Learners identify appropriate equipment and facilities for setting up computer hardware maintenance and repairs workshop for a provided scenario. Provided with a site plan, learners identify appropriate size and layout for the workshop. PC1.4 Attestation from a MC that learners demonstrate the required skills during their practical sessions of maintaining clean, safe and secure work environment. Learners also take on-line quiz to test their knowledge of PC1.1, 1.2, 1.3, 1.4 L:30 min ,I	A checklist and descriptions with images of appropriate equipment and facilities for setting up computer hardware maintenance and repairs workshop. A checklist with key factors to be considered when identifying appropriate locations for Computer Hardware Maintenance and Repairs Business. An Infographic document / checklists with description and graphics of what is appropriate size and layout for the workshop. An infographic guide to maintenance of clean,

To guide the planning, design, development and creation of a learning resources and activities to meet the occupational standards of a unit /module, relevant to a specific skill set.

		safe and secure work environment		
Apply Managerial and Customer Service Principles to Computer Hardware Maintenance and Repairs Business	PC2.1 Provided with 3 scenarios, learners identify for each how they would attend to customers with process they will follow when collecting and returning computers to customers. PC2.2 Provided with a scenario, learners identify the documentation and process when collecting and returning computers to customers. PC2.3 MC observation of learners demonstrating communication and interpersonal skills when interacting with a customer. PC2.4 Evidence of records of income, expenses, assets and liabilities of the business that learners have produced verified by the MC. MC sign off of this assessment. PC2.5 Provided with 2 scenarios learners estimate the cost of repair of faulty computers.	A document containing key principles and process of how to attend to customers with faulty computers. A Sample documentation/form describing what is required when collecting and returning computers to customers. A guide to good communication and interpersonal skills to achieve customers' satisfaction. Videos of poor customer service interactions. A Demonstration of MC or video on good communication and interpersonal skills to achieve customers' satisfaction.
